

We were so glad to have attended your seminar prior to purchasing a home in this market. Prior to attending, we found tons of homes on Zillow and saved them and my wife wanted to set up showings. Luckily we waited because most of them were sold already or we weren't preapproved and they would have been long gone by the time we were ready to write an offer. We ended up getting preapproved with your brother and he did an amazing job explaining the financial side of the process just like you did the buying end. We were connected to an agent from Edina Realty through your relocation program.

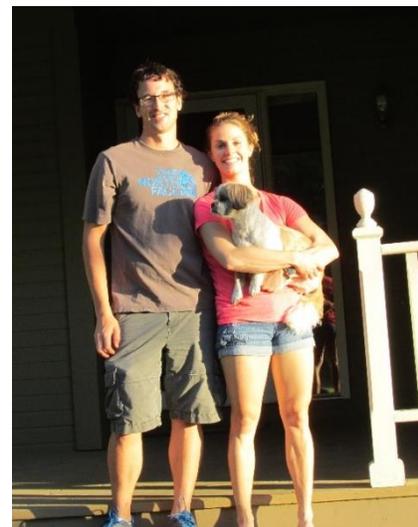

We viewed 7-10 homes overall and put above asking price offers in on 3 and got one in our area at the top of our budget. We are very happy to end up where we are and Kayla actually didn't see the inside of the home until the inspection. We are currently in the negotiation process of the closing and everything seems to be going well!

We definitely learned a ton from the seminar, and thank you so much for putting it on. I was waiting for the "catch" of the seminar, but it never came, and we got a great loan agent and the relocation services eliminated the \$444 realtor fee typical charged by Edina Realty, so you saved us a ton of money besides empowering us to search for and buy a great home. We went into the process completely blind and now I feel like we know a majority of what happens during the home buying process. Just knowing what the purchasing process would be like ahead of time made the process less stressful. I think all the information in the talk was very helpful and nothing needed to be cut. I also enjoyed having financial information about different types of loans, approval etc.

I really hope you continue doing this, because as early physicians we really appreciated your no sales pitch honest information about home buying. If you ever move to Minnesota and are still a Realtor, please let us know because we will be moving in the next 3-4 years and will need a good one!

Thanks again,

- Dr. Brent and Kayla S. – University of Minnesota Medical School 2017

"I bought my first home upon graduation. After attending the seminar presented by Paul Griffin, I felt confident in starting the home buying process. It was very easy to use the Stark Relocation Department and I would recommend other doctors to utilize this free service as well. Their relocation department is very straightforward and the matching process did a great job of matching me with a realtor that suited my needs and personality style.

It was a seller's market, so houses were flying off the market fast. I did some preliminary looking, but my realtor really helped iron out what I liked and didn't like about each home. This streamlined the process in a fast moving market going forward. I did lose out on a great home, but ended up finding one even better at a similar price point so it worked out.

I would definitely reuse Paul Griffin and the Stark Relocation Department in the future."

"Our journey overall went very well, we appreciated learning all that we did at the seminar.

The seminar provided invaluable information and knowledge about buying a home. After we attended the seminar we felt prepared and comfortable to start the home buying process.

The transition to a local realtor was seamless. She was wonderful and realistic, and we were able to find the exact home we were looking for. We likely toured upwards of 20 homes prior to finding our new home and we love it. Another aspect we appreciate is that you and Brian were very responsive and available for questions during the process.

Again, thank you Paul!"

"Thank you for your letter and your help getting an apartment in my new city. It would have been a daunting task to do solo from school! When the time comes to relocate, I'm thankful to have someone I can trust and turn to."
